Hair Loss Control Clinic HLCC Wins Prestigious UK Award

HAIR LOSS CONTROL NAMED MOST INNOVATIVE

The Hair Loss Control Clinic UK took top honors for "Most Innovative Aesthetic Service or Treatment" at the annual MyFaceMyBody Awards in London. The awards, which are part of the MyFaceMyBody television show and website, recognize excellence in esthetic services, cosmetic surgery and cosmetic dentistry. Winners were honored at a Nov. 3, 2013 gala held at the Landmark Hotel in London.

"Laser hair loss treatment is still fairly new in the UK, yet HLCC has already established worldwide credibility with 25 years of experience and great client results. This was a fantastic opportunity and we are very excited to be honored with this award, so we would like to cordially thank MyFaceMyBody," says Sajida Rashid, medical director for HLCC UK. "The Hair Loss Control Clinic's hair restoration technology is not only innovative, but cutting edge, and it is at the forefront right now, here in the UK. People are no longer shy about taking action against their hair loss and thinning hair. They want answers, results and solutions."

Nancy Bellard, Vice President of Sales & Marketing for Hair Loss Control Clinic in the United States, attended the ceremony in support of the company's affiliate partner. "We are thrilled that Sajida has won this prominent award; she is very deserving of it and has worked hard to earn it. We are fortunate to have her represent us in the UK," says Bellard.

Other winners included: Vaser Body Balancing by The Private Clinic for the Best Body Reshaping Procedure; the Genuine Dermarolle for Best Skin Tightening Treatment; ActiDerm Aesthetimedms for the Best Cosmeceutical Product; and CoolSculpting for the Best Non-Surgical Makeover.
